Patent No. 5578481
GENERAL INFORTION:
APPLICANT: ISBIRAWA, YOSHINITO
TITLE OF INVENTION: Cloning and Characterization
TITLE OF INVENTION: Cardiac Adenylyl Cyclase
UNMARER OF SEQUENCES: 2
CORRESPONDENCE ADDRESS:

Patent No. 6436672

GENERAL INFORMATION:

APPLICANT: Tomlinson, James

APPLICANT: Tomlinson, James

TITLE OF INVENTION: CLCLASE

TITLE OF INVENTION: CYCLASE

TITLE OF INVENTION: CYCLASE

FILE REPERENCE: 44481-5027-01-0S

CURRENT FILING DATE: 1999-12-29

PRIOR PPLICATION NUMBER: PCT/US98/13540

PRIOR PLILING DATE: 1998-07-01

PRIOR PLILOR INVENTION NUMBER: 60/070, 901

PRIOR PLILOR APPLICATION NUMBER: 08/086, 362

PRIOR PLILOR DATE: 1997-07-01

PRIOR PLILOR DATE: 1997-07-01

Patent No. 6107076

GENERAL INFORMATION:
APPLICANT: Tang, Wei-Jen
APPLICANT: Gilman, Alfred G.
TITLE OF INVENTION: SOLUBLE MAMMALIAN ADENYLXL CYCLASE
TITLE OF INVENTION: AND USES THEREFOR
NUMBER OF SEQUENCES: 31
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           White & Durkee
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
